Sheep Market Report

5TH OCTOBER 2022 - A YARDING OF 4950 SHEEP & LAMBS, WITH 2500 LAMBS AND THE BALANCE SHEEP.

A larger yarding this fortnight with a slightly reduced buying panel. Very few extra heavy lambs on offer again, but still remained firm. Some very good new season lambs coming through now which held firm to \$5 cheaper from last fortnight - the majority of the lambs being secondary old season lambs. Grown sheep were cheaper across the board with some good runs of x ewes & merino wethers on offer all remaining firm from last sale.

IMPORTANT NOTICE - All Sheep Producers

One of our major buyers has advised that effective immediately, all vendors are required to complete additional information at Question 7 on your NVD to indicate the status of lambs with regard to their antibiotic free status. At Question 7, you must declare

"Raised Without Antibiotics"

or in rare cases "Raised With Antibiotics". Most pasture fed Australian lamb would be antibiotic free, however some feed supplemented/feedlot lambs may have had exposure to antibiotics within the feed ration.

A man staggers into an emergency room with two black eyes and a five-iron wrapped tightly around his throat.

Naturally, the doctor asks him what happened.

"Well, it was like this," said the man, "I was having a quiet round of golf with my wife when she sliced her ball into a pasture of cows.

We went to look for it and while I was rooting around, I noticed one of the cows had something white at its rear end. I walked over and lifted the tail and sure enough, there was my wife's golf ball-stuck right in the middle of the cow's butt. That's when I made my mistake."

"What did you do?" asks the doctor.

"Well, I lifted the tail and yelled to my wife, 'Hey, this looks like yours!'"
